

What is Freedom?

Freedom Concepts was born from a special request to build a bike for a child with special needs. That one bike was such a huge success that it opened the door to many new requests and the birth of a company. Our products help people with disabilities live a life that is dignified and independent and allow users to participate rather than be separated or isolated. Be it recreational, therapeutic or for general mobility, we can help individuals succeed where others thought not possible.

Physical Therapy, Made Fun!

Working closely with physical and occupational therapists, Freedom Concepts ensures that all of our products provide a highly effective and measurable therapeutic benefit to our clients. Riders can build muscle strength, learn new movement patterns, and pedal towards individualized therapy goals, all while experiencing the thrill of riding a bike!

DCP 16

Dedicated to Your Comfort, Support and Style

chill-outchair.com

Chill-Out Chairs assist with a wide range of behavioral and therapeutic needs. Comfortable and supportive, Chill-Out Chairs are built using a combination of high-grade foams that hug the user in place and allow the body to relax.

Fabric Options

Available in several functional fabric options - Easy to clean vinyl, durable and stylish tweed featuring Sunbrella® and Crypton® materials, or our comfortable plush fabric.

Foam Options

Chill-Out Chairs are available in two foam packages: Essential and TEC (the preferred choice for multi-use environments).

Each package comes with different benefits and options designed to fit your individual needs.

Roll'er

With a rolling wheelbase, the Roll'er can reduce the number of transfers required throughout the day - Perfect for therapy settings, home or school. It provides overall comfort while keeping the user secure and properly positioned for maximum engagement and participation.

Rock'er

Known for its adjustable tilt and calming rocking motion, the Rock'er can improve the user's alignment and redistribute pressure. The Chair can be locked into the optimal tilt position with the aid of the Ottoman, setting the Chair to the ideal angle of tilt suitable for the user's needs.

Accessories

We carry a variety of accessories to help with positioning needs and help you get the most out of your Chill-Out Chair. For a full list of accessories, please contact us.

Multipurpose Ottoman

Standard with all Chairs, the Multipurpose Ottoman is designed primarily with leg elevation in mind. The Ottoman elevates legs, aids in passive stretching and reduces edema in the lower extremities. It also serves as caregiver seating, a side table or can be fastened to the Chair with the aid of Velcro to secure the Ottoman to the Chair.
