## Summary of Medical Condition

**Primary diagnosis:** 5q31,2-3 microdeletion (Pura Syndrome)

**Date of onset:** Diagnosed in November 2016

**Secondary Diagnosis(s):** developmental delays, hypotonia, seizures, feeding delays, respiratory difficulties

**Treatment Diagnosis(s):** gross motor skills, fine motor skills, oral motor skills, positioning, strength, endurance, coordination

### CLINICAL CRITERIA

Is there a mobility limitation causing an inability to safely participate in one or more Mobility Related Activities of Daily living in a reasonable time frame? Yes Are there cognitive or sensory deficits (awareness/judgment/vision/etc) that limit the users ability to safely participate in one or more MRADL? Yes Does the user demonstrate the ability or potential ability and willingness to safely use the mobility device? Yes Can the mobility deficit be sufficiently resolved with only the use of a cane or walker? No Does the user's environment support the use of the requested device? Yes Does the user have sufficient function/abilities to use the recommended equipment? Yes

### Recommended due to:

- Provides alternative positioning within the home
- Promotes upright posture while sitting
- Provides an appropriate seating surface for ADLs and feeding within the home
- Is able to fit under a standard table for self feeding

Chill-out-Roller by Freedom

Color:

Size:

The Roll'er is ideal for going from room-to-room in therapy settings, at school or at home. With a rolling wheelbase, the Roll'er can help to reduce the number of transfers required throughout the day, helping to increase the users overall comfort. With upright positioning and the same patented deep "V" foam design as all Chill-Out Chairs, the Roll'er keeps users secure and positioned for maximum engagement

and participation. The Roll'er comes standard with a supportive wooden base that allows for accessories such as our Feeding/Activity Tray Push Bar to be added.

**Medically Necessary accessories to best support the user:**

1. Adjustable occipital Headrest: due to poor head control and excessive extension pattern
2. 3 foam piece positioning aids: functions as laterals and maintaining optimal sitting midline and trunk positioning.
3. TEC Foam Package: comes standard with a 3-year warranty unlike the other 2 options which only come with a 1 year warranty. The TEC Foam provides soft comfort, firm support, and best durability at all weights. The TEC Foam Package features memory foam in areas of high-friction (under the knees and head cradle) to increase comfort and eliminate pressure points.
