Arm Length: 16" - 24"

## Tips For Choosing an Adaptive Bike

### 1. Measure Arm Length

To properly size the rider on a handcycle we recommend measuring the riders arm length. Measure from the palm to the back of shoulder and provide the dimensions below. If a hand and foot propulsion bike is required, we also ask for the rider's leg inseam. For the leg inseam, measure the distance between the bottom of the rider's heel to the top of the rider's inner

### 2. Know Your Accessories

We offer many different accessories to help people of all abilities experience freedom. Make sure to look through all of our available accessories to make sure the adaptive bike will work for the rider. More information on all of our accessories is available at: [www.freedomconcepts.com/product-lines/adaptive-bikes/accessories/](http://www.freedomconcepts.com/product-lines/adaptive-bikes/accessories/)

### 3. We Do Custom

If none of our current models of adaptive bicycles work for you, we are able to custom build a bicycle that will. Please contact us at 1-800-661-9915 for more information.
